

Australian Materials Research Society

Presented to

Professor Jim Williams AO

The Australian National University

In recognition of his pioneering research in semiconducting materials and for his outstanding leadership, mentorship and service to the materials research community over more than 3 decades, including his establishment and leadership of the Australian Materials Research Society and the Department of Electronic Materials Engineering at ANU and his dedicated service to the IUMRS, through its General Assembly and as Secretary and Second Vice President

Professor Lianzhou Wang
President
